Question:

Explain how the principle of overload is applied in a training program.

Sample Mark Scheme Breakdown:

- Level 1 (Basic understanding):
  - Mentions increasing intensity or duration without explanation. (1 mark)
- Level 2 (Developed understanding):
  - Explains that overload involves gradually increasing training demands to improve fitness. (2 marks)
- Level 3 (Detailed explanation):
  - Describes applying overload by systematically increasing workload, monitoring progress, and avoiding injury. Includes examples such as adding weight or running longer distances. (3 marks)

Ideal Response:

"Overload is applied in training by gradually increasing the intensity, duration, or frequency of exercise to challenge the body and stimulate adaptation. For example, a runner might increase their weekly mileage or speed over time, ensuring the body adapts to higher demands without risking injury."

This breakdown shows how points are awarded based on depth and accuracy, guiding students to incorporate specific details and examples.

## Common Mistakes to Avoid When Using the Mark Scheme

### - Vague Answers:

Providing generic responses without specific detail can limit marks. Be precise and detailed.

### - Ignoring Command Words:
